## PAGER Version 9

Created: 2 weeks, 3 days after earthquake

### Estimated Fatalities

Estimated economic losses are less than 1% of GDP of Nepal.

### Estimated Economic Losses

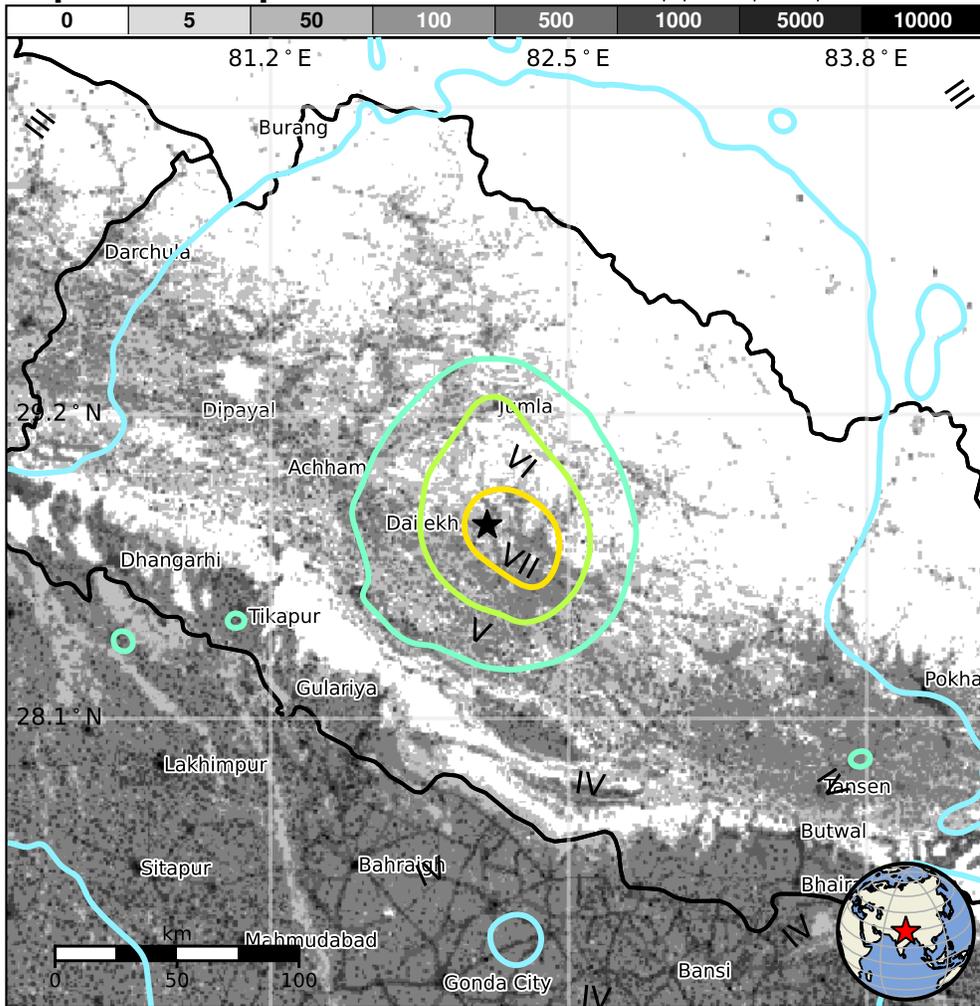

Yellow alert for shaking-related fatalities and economic losses. Some casualties and damage are possible and the impact should be relatively localized. Past yellow alerts have required a local or regional level response.

## Estimated Population Exposed to Earthquake Shaking

## Population Exposure

### Structures

Overall, the population in this region resides in structures that are highly vulnerable to earthquake shaking, though some resistant structures exist. The predominant vulnerable building types are adobe block and unreinforced brick with mud construction.

### Historical Earthquakes

Date (UTC)	Dist. (km)	Mag.	Max MMI(#)	Shaking Deaths
1999-03-28	322	6.5	VIII(7k)	100
1980-07-29	133	6.5	IX(11k)	100
1991-10-19	387	6.8	VIII(60k)	2k

Recent earthquakes in this area have caused secondary hazards such as landslides that might have contributed to losses.
